About the 19th Annual Self Care Conference – *Embracing Self Care for Life*

This year's conference aims to be interactive and inspiring and to provide practical solutions on how to support people to embrace self care and understand how this will benefit their life. Central to the event, which is the 19th Annual Self Care Conference, is a World Café style discussion and “show and tell” session showcasing inspiring visionaries that have implemented structures and strategies to help improve people's health in the community.

This essential programme is tailored towards health providers and commissioners and those with responsibility for improving people's health and wellbeing; it aims to inspire, motivate and encourage creative thinking on how to support people to better look after their own health and adopt self care as their lifelong habit.
